K  ho rangers take a breather after spending a day out in the forests. Around 4 to 5 villagers accompany full-time forest rangers on regular patrols that involve general conservation and law enforcement work. The Biodiversity Corridor Program raises awareness amongst the local communities about the need to preserve the surrounding environment. Mainstreaming Environment for Poverty Reduction (MEPR) is financed by the Poverty and Environment Fund (PEF) that promotes accelerated learning and innovative approaches on poverty-environment linkages.

Hillside in Da Nhim shows some evidence of logging. Despite its status as a protected area, the cutting of trees is still permitted on a very limited scale at the Bidoup Nui Ba National Park. The Biodiversity Corridor Program raises awareness amongst the local communities about the need to preserve the surrounding environment. Mainstreaming Environment for Poverty Reduction (MEPR) is a financed by the Poverty and Environment Fund (PEF) that promotes accelerated learning and innovative approaches on poverty-environment linkages.

Rangers head out to patrol the forests near Da Chais. The jungles in Lac Duong are an essential watershed that feeds nearby hydropower plants, and supplies water to towns and cities in Lam Dong Province. The Biodiversity Corridor Program raises awareness amongst the local communities about the need to preserve the surrounding environment. Mainstreaming Environment for Poverty Reduction (MEPR) is a financed by the Poverty and Environment Fund (PEF) that promotes accelerated learning and innovative approaches on poverty-environment linkages.
